

Amendments to the Specification:

Page 10 line number 27 through 29:

In this embodiment, there is furthermore no ring seal between the contact-pressure ring 29 and the annular cylinder 22. Although the compensating chamber 32 now extends as far as the ~~ring-seal 33~~-annular piston 23 of the | working chamber 26, the compensation of the centrifugal forces can be set as desired by adapting the inside diameter of the compensating cover 31.
